

DL 1100

CHU 2425 | RM 81

DL 1100 is a high yielding early hybrid for the northern markets. Starting with above average spring emergence and vigour, this hybrid exhibits very good plant health, early flowering and consistent ears. DL 1100 has high test weight, with flint-dent grain on white cobs. It is an excellent choice for grain or silage in short season areas where there is a risk of early frost.
